## Experience

### FYidoctors

*Web Developer, August 2019 – Present*

- Essential in creating and implementing a browser-based online virtual personal shopping experience using WebRTC.
- Transitioned control of website and website applications from a 3rd party marketing group.
- Developed several new custom modules for the content management system (Asgard CMS).
- Improved existing modules, and remedied legacy bugs.

### InnoTech College

*Fullstack Development Instructor, April 2018 – October 2019, September 2020 – April 2021*

- Develop teaching materials full-stack curriculum for the 6-month Fullstack Development Diploma. Materials included: Presentations, demo packages, exercises, quizzes, and more.
- Teach students how to develop websites using a predominantly open-source stack.
- Prepare students for the industry and different scenarios they are likely to encounter.

## Coco Brooks

*Contract Graphic/UI/UX Designer, March 2018 – May 2019*

- Put fourth creative new design ideas for print & digital media, while respecting and preserving the existing brand.
- Revamp existing dated website interfaces with exciting design and new technologies.

## AthleteBook

*Contract Web Developer, April 2017 – July 2017*

- Translated existing design PSD files into usable visual components and Laravel Blade templates.
- Managed new and existing workflow for an overseas development team utilizing Agile and JIRA.
- Designed and developed single page promotional websites.

## Renoworks

*UI/UX Designer & Frontend Developer, June 2014 – April 2017*

- Lead designer for new user interfaces.
- Converted client-provided designs into templates and visual components compatible with the Renoworks Enterprise platform.
- Conceptualized and developed the first proof-of-concept for the Renoworks "Color Picker" phone app.
- Assisted colleagues with any and all HTML5/CSS3 related questions or issues.

## Western Inspection

*Web Application Developer, February 2013 – May 2014*

- Tasked with developing a new, cross-platform capable, browser-based business software.
- Consult and assist in the eventual replacement of workstation and server infrastructure from a Windows 2000 platform to a Linux based system.

## open2space

*Contract Web Developer, June 2011 – March 2012*

- Developed layouts, views, and controllers in Zend PHP for an enterprise level client.
- Gained a solid understanding of MVC principles.
- Developed and maintained several small Drupal 6 & 7 websites for new and existing clients.

## StyleLabs Marketing Group

*Contract Production Manager April 2010 – October 2010*

- Acted as a liaison between marketing and development team. Translated marketing objectives into development tasks.
- Played a key role in the conceptualization and initial development of a proprietary CMS.
- Managed workflow for a small team consisting of myself, a junior developer, and a graphic designer.

## Cambrian House

*Junior Web Developer, April 2007 – February 2008*

- Worked on a variety of crowdsourced website start-ups.
- Converted PSD's from the design team in to HTML and CSS websites.
- Worked to ensure cross-browser compatibility between major browsers.
- Discovered and helped patch a security vulnerability on the company's public forum software.
